

```
{| border="center" border="1"
|Orange
|Apple
|-
|Bread
|Pie
|-
|Butter
|Ice cream
}
```

Ex. 0: extended

including some of  DokuWiki's Syntax

The „zero“ Example from Eric-Sebastien (from page  [users:wflamme:exttab1](#)):

```
<exttab1> {| width=80% align=center
```

Ex. 2: Alternative

```
</exttab1>
<exttab1> {| border="center" border="1"
<exttab1> {|
{| width=80% align=center
|align="right"|Apple|[[wiki:page|{{wiki:dokuwiki-128.png}}]]
|-
|Bread|Pie
|align="right"|
|-
|Butter|Ice cream
|align="right"|
}
```

The other examples are taken from <http://www.mediawiki.org/wiki/Help:Tables>

```
{|
|border="1"
|Orange|Apple||more
|-
|Apple|Bread|Pie||more
|align="right"|12,333.00
<exttab1> {|
|-
|Butter||Ice cream||and more
|-
|Bread
|Pie
|align="right"|500.00
|-
|Butter
|Ice cream
|align="right"|1.00
|}
}
```

Ex. 1: Plain

with HTML attributes

Ex. 3

```
<exttab1> {| border="1"
Ex. 6
```

for single lines

```
<exttab1> {| border="1"
```

align=„right“
align=„right“

```

<table border="1" style="width:100%; border-collapse: collapse; text-align: right; border: 1px solid black;">
|  |  |
| --- | --- |
| Dish | Complement |
| Orange | Bread |
| Apple | Pie |
| Butter | Ice cream |
| 12,333.00 | 500.00 |

```

With HTML attributes and CSS styles table with TH headings

Ex. 9

```

<table border="1" style="width:100%; border-collapse: collapse; text-align: right; border: 1px solid black;">
| Dish | Complement |
| --- | --- |
| Orange | Bread |
| Apple | Pie |
| Butter | Ice cream |
| 12,333.00 | 500.00 |

```

table with caption

Ex. 10

```

<table border="1" style="width:100%; border-collapse: collapse; text-align: right; border: 1px solid black;">
| Dish | Complement |
| --- | --- |
| Orange | Bread |
| Apple | Pie |
| Butter | Ice cream |
| 12,333.00 | 500.00 |

```

</exttab1>

```

{
  border="1" cellpadding="20" cellspacing="0"
  align="bottom" style="color:#e76700;" | 'Food complements'
  -
  Orange
  Apple
  -
  Bread
  Pie
  -
  Butter
  Ice cream
}

```

some final words

Here I stop (for now?) – if I try to put H1...H6 into the tables, the formatting chaos will overwhelm me

. Hunting for the correct nesting of HR, TD, and CAPTION tags was quite a game... Maybe the fact that the alignment does not always work correct is caused by the template. Following the

produced code it should be aligned correctly 🙄

Anyone please feel free to modify the code – and please tell me what and why you did so that I can be happy about these modifications in my own wiki 🙄
